

PRAISE FOR *CHRONICLES OF HOPE*

What People Are Saying

“This is an amazing piece of work both from the perspective of the content and the method with which it was collected. Consciousness needs to be raised for people to realize there is more than one way of doing things. We all need to remember we are spirits first, and that we are all connected. This book had opened many doors that have allowed me to better appreciate the melding of mind, body, and spirit when working with my patients and clients. I am humbled to be part of Team Hope.”

— *Brian Hill, PT, CH, member of Team Hope*

“*Chronicles of Hope* sounds the alarm for environmentalists to wake up to the seriousness of the Earth’s warming, and calls attention to the fact that we do indeed need to be very concerned about its stewardship. As the temperature warms and sea levels rise, we’re not only going to have to relocate people, we’re going to have to implement the assisted migration of plants and animals. This book provides verification from a high spiritual realm that there is, however, still time for restoration and conservation. We must bring nature back. We have the tools.”

— *Dr. Annelle Soponis, BCH, Ph.D. in biology, member of Team Hope*

“Many have felt the presence of what they refer to as some sort of energy or ghost activity or have friends or family who have described this. While this is relatable for a lot of people, *Chronicles of Hope* helps to answer the questions surrounding the validity of this feeling and what this energy is, which I think helps to reduce the stress around it.”

— *Dr. Laura Chan, ND and LAc*

“This book and the inspired hypnosis sessions have impacted my life profoundly. It’s guided me to get in touch with myself and anchored the belief that I am greatly supported by a wealth of angelic love. The adversities in my life have not slowed down, but the way I view them and the strength I pull from them is more profound due to the amount of love, guidance, and support I have from spirit. It has been a privilege to be involved with this project.”

— *Denise McCalvey, CH, member of Team Hope*

“I’m so grateful to see this timeless message coming to us as a new language. This call challenges us to transform ourselves and our planet. We need to do what we can to inject this truth into our existence as we are guided through this important healing work.”

— *Kenneth Beaupre, LMHC*

“Your book was like consuming a single potato chip, you immediately crave and demand more. It is a mesmerizing journey of deep reflection challenging traditional, personal, and societal beliefs. People who are spiritually oriented will find this book to be revolutionary.”

— *Albert J. Marotta, MA, CHT, Transpersonal Hypnotist*
